PROJECTS

End to End CI/CD Implementation — Jenkins

Implemented an end to end CI/CD pipeline for

Java based application using Jenkins declarative pipelines. As part of the pipeline, I have implemented various stages such as Build, Unit Testing, static code analysis, SAST, DAST, Creation of Docker Images, Deployment on Kubernetes platform using Argo CD.

Three Tier Architecture — AWS

Implemented three tier architecture that is highly available and scalable using Terraform and deployed the application on EC2 instances using the User Data script.

AWS Components involved: VPC, ASG, Route53, CDN, ELB, EC2, S3, NAT, API Gateway

Cloud Cost Optimization — AWS

Used the combination of AWS Cloudwatch and Lambda functions to decrease the cloud cost by 25 percent.

Implementation: Created lambda function in python, used the boto3 module to interact with AWS service APIs and this lambda function is triggered by CloudWatch events. This lambda function would watch for any unused EBS snapshots and either delete them or send them notification to the snapshot owner.

EDUCATION

Symbiosis Institute of Technology, Pune — BTech in Computer Science

CGPA - 7.2

AUG 2022 - JUNE 2026

Anandalaya, Anand — School

APRIL 2008 - MARCH 2022

- CBSE 10th Board - 92%

- CBSE 12th Board - 88%

SKILLS

Kubernetes

AWS

Terraform

Ansible

Docker

Linux

Git, Github

Bash, Python

Computer Networks

AWARDS & CERTIFICATIONS

Introduction to Kubernetes

The Linux Foundation

Introduction to GitOps

The Linux Foundation
